# SHEHAB SAAD

## Full-Stack Web & Mobile App Developer | Game Developer | 3D Designer

Email: fuuytf1@gmail.com Phone: +20 11 26024496 Location: Egypt Portfolio:shehabsaad71.github.io/shehab

GitHub:github.com/shehabsaad71 itch.io:shehab-dev-7.itch.io LinkedIn:linkedin.com/in/shehab-saad

## PROFESSIONAL SUMMARY

Highly dedicated and versatile Independent Software Developer and Game Creator with extensive practical experience in full-stack web technologies, mobile app packaging, 2D/3D game development engines, and interactive visual interface design. Proven track record of independently architecturalizing, developing, and releasing dynamic web applications, physics-driven browser games, multi-platform projects, and 3D environment pipelines. Adept at rapid skill acquisition, algorithm optimization, low-level game mechanics implementation, and integrating modern AI technologies. Seeking to leverage strong foundational engineering skills towards high-impact international academic pursuits and advanced software development roles.

## TECHNICAL SKILLS

| | |
|---|---|
| **Programming Languages** | JavaScript, TypeScript, Python, C, C++, C#, PHP, Lua, GDScript, HTML5, CSS3 |
| **Web & Mobile Frameworks** | Bootstrap, Tailwind CSS, Node.js, Express, Capacitor (Mobile Packaging), REST APIs |
| **Game Engines & Graphics** | Godot Engine 4.x, Unity, Blender (3D Modeling & Assets), Phaser, Canvas API, Web Audio API |
| **Physics & Game Toolkits** | Rapier Physics Engine, 2D/3D Collision Detection, Custom Game Loop Design, Sprite Mechanics |
| **Development Tools & DevOps** | Git, GitHub, GitHub Actions (CI/CD workflows), npm, SQL, LocalStorage Architecture, rclone |
| **UI/UX & Design** | Responsive Design, Dynamic Theming (Light/Dark), Asset Workflows, Ergonomic Interface Layouts |

## FEATURED SOFTWARE & GAME PROJECTS

### Edge of Steel — 3D Dark Fantasy Medieval Game

**Active Development**

*Lead Developer & Environment Designer | Studio: ShadowCore Games*

- Architected a multi-platform 3D dark fantasy action-adventure game using **Godot Engine 4.7**.
- Designed atmospheric, high-fidelity environments featuring dynamic fog, lightning, volumetric cloud systems, and optimized 3D GLB mesh assets.
- Engineered custom player mechanics including sword combat, directional dodging, parrying algorithms, climbing physics, and state machine-driven enemy AI.
- Built a fully functional, localized 3D Main Menu with persistent settings (`user://settings.cfg`) supporting real-time language switching (English/Arabic via `TranslationServer`).

### GameVerse — Multi-Game Platform & Mobile Application

**Completed / Maintained**

*Full-Stack Mobile & Web Creator*

- Engineered an offline-capable, highly performant collection of 20 classic arcade and puzzle games designed for Web and Android environments (packaged via Capacitor APK pipelines).
- Integrated lightweight game frameworks including **Phaser** and **Rapier Physics Engine** in JavaScript/Node.js environments.
- Featured games include *CyberFlip, GameVerse Challenge, Chess, Sudoku, Block Blast, Tetris, Billiards,* and *Fruit Merge*.
- Implemented custom high-score persistence using segmented `gameverse.settings.*` local storage architecture and smooth canvas rendering optimization.

**Pixel Kick — 2Player Arcade Football Game** **Completed**
*Lead Developer & Physics Designer*

- Developed a responsive 2-player local competitive football game using vanilla HTML5, CSS3, JavaScript, Canvas API, and Web Audio API.
- Programmed custom 2D ball physics with low/high kick vectors, precision goal-line detection, customizable match timers, dynamic sound settings, and touch/keyboard input bindings.
- Configured complete Android APK deployment workflows via GitHub Actions using OpenJDK 21, Custom Release Keystore signing (RSA 2048), and Capacitor JS bridge.

## WEB & APPLICATION PORTFOLIO

**Azem Alquran Platform** **Live Project**
*Web App Creator | URL: azemalquran.netlify.app*

- Built an accessible Islamic digital platform designed for community engagement and Quranic resource management.
- Presented live on stage at the headquarters of Khairkom Association during community outreach events.

**Ennabi Grill Platform** **Live Project**
*Front-End Developer | URL: ennabi-grills.netlify.app*

- Designed and implemented a modern, high-converting responsive restaurant web interface featuring dynamic menu showcases, featured culinary items, and optimized assets.

**Tela UI Redesign & Portfolio Ecosystem** **Completed**
*UI/UX Engineer & Software Developer*

- Executed a unified, theme-driven UI overhaul for the Tela software platform, implementing clean visual hierarchy, consistent color systems, and seamless navigation triggers to external developer accounts.

**Readly PDF Reader & Emogo Utility Suite** **Completed**
*Utility Web Tools Creator*

- Engineered *Readly*, an accessibility-focused PDF reader with Text-to-Speech playback integration.
- Created *Emogo*, a real-time emoji search engine, categorization tool, and instant clipboard utility.

## EDUCATION & ACADEMIC COURSEWORK

**Arizona State University (ASU)** **August 2026 – Present**
*Universal Learner Program — Academic Credit Coursework*

- **Coursework:** ENG 101 — First-Year Composition I (Instructor: Shelby Shriver Bocchirchio).
- Focusing on advanced academic writing, research synthesis, critical textual analysis, and rhetoric. Maintained a 4.0 GPA target across coursework evaluations.

**Independent Computer Science Foundations** **Ongoing**
*Self-Directed Higher Education & International Aspirations*

- Rigorous self-directed learning in data structures, algorithms, 3D graphics math, and AI application engineering aimed at pursuing undergraduate CS degrees in North America / Australia and long-term research in Artificial Intelligence.

## CERTIFICATES & VERIFIED ACHIEVEMENTS

- **Harvard University (CS50):** Certificate of Completion in Computer Science and Programming Fundamentals. Mastered foundational concepts in C, Python, algorithms, memory management, and computational thinking.
- **IBM:** Web Development Professional Certificate. Verified competencies in core front-end technologies, HTML5, CSS3, JavaScript ES6+, responsive design principles, and modern web architectures.
- **Gemini Certification for Students (K-12):** Verified skills in Generative AI principles, prompt engineering, critical evaluation of AI outputs, bias detection, hallucination management, and academic integrity in AI usage (Nov 2026).
- **Microsoft:** Certificate / Learning Transcript in Developing Generative AI Applications on Azure cloud platforms.

## LEADERSHIP & COMMUNITY ENGAGEMENT

**ShadowCore Games** — **Founder & Lead Developer**

Founded an independent multi-member game development initiative overseeing project pipelines, 3D asset integration, gameplay design, and code architecture across core gaming titles.

**Khairkom Association** — **Event Volunteer & Presenter**

Contributed to community engagement activities and officially presented the Azem Alquran digital platform on stage at the association’s headquarters.

**ProTech Rise Academy (Cohort 2) & EDFDI** — **Accepted Participant / Member**

Accepted into the Frontend Development Track at ProTech Rise Academy. Member of Egypt The Dream Foundation for Development & Innovation (EDFDI) exploring tech innovation pathways.
